REHAU EDGE.™ **REALLY FAST.**

Compress 40% faster with no expansion needed.

REHAU EDGE™

INNOVATIVE TECHNOLOGY

Insert

Compress

Done!

	Compression Sleeve	Crimp	EDGE™
No expansion required			
No Gauge required			
No over- or under- crimping			
Rotatable dual jaws for battery tools			
Fitting grips to the pipe before compression			
Visual control of pipe insertion depth			
Visual check of completed connection			
Immediate pressure testing			
Leaks when uncompressed			
25-year system warranty			

It's your **EDGE™**

The EDGE of tomorrow

EDGE™ is a revolutionary new piping system that offers the safety of compression sleeve with the speed of crimp. EDGE™ is designed for security and speed without the need for expansion. EDGE™ is a comprehensive plumbing solution consisting of DZR brass fittings and solvent-resistant polymer sleeves and fittings, highly flexible PN16 PE-Xa pipe ranging from 16mm to 32mm for hot and cold, recycled and rainwater use.

Fitting stays in place after being inserted

No pipe expansion required

Visual control of pipe insertion via inspection windows

Visibly leaks when uncompressed

Security without the steps

Developed in collaboration with installers and designers, EDGE™ is the next evolution in compression sleeve technology. REHAU EDGE™ is the perfect solution for plumbing professionals who value speed, security and a competitive edge for their installations.

Advantages of **EDGE™**

- Fast to Install
- Secure Compression Sleeve Joint without expansion
- Size Range 16 – 32mm
- Flexible and kink-resistant PE-Xa, SDR9, PN16 Pipe
- Brass and Lightweight Solvent Resistant Polymer Fittings
- Working Temp 70°C @ 800Kpa
- **25 year warranty**

Q. What adaptors are available to other systems?

- A.** EDGE to pressfit copper fittings are available.
Adapting EDGE to other systems is possible via a threaded connection.

Q: What tools can be used?

- A:** RAUTOOL Alight-2, A3, E3 and Rothenberger Romax
Axial tools with EDGE jaws are suitable battery tool options.
RAUTOOL L1 with EDGE jaws is a manual tool option.
Suitable EDGE jaws can be identified by their black colouring and EDGE markings.

Q. How can EDGE be differentiated from other systems?

- A.** EDGE pipes come in bright silver colour for hot and cold water, and in red, green and lilac. All pipes have EDGE markings in double line print running the length of the pipe to differentiate from other systems.

Q. Can the fittings be rotated after installation

- A.** Yes, fittings can be rotated after installation without affecting the integrity of the joint.
